## Understanding the Language of Fish

***At the forefront of Marine Science, LIQUID MOTION FILM announce revolutionary new Series... & garner highest Awards!***

In association with the worlds leading Research Scientists, from Internationally Acclaimed, ward Winning Filmmakers Liquid Motion Film comes '**WATER COLOURS**' - a pioneering journey of underwater discovery bringing a revolutionary understanding of the language of the fish. For years, man has sought the meaning of the fishes' incredible colours. He's never truly understood, because he's always looked through human eyes. At the forefront of Marine Science this sensational premiere unravels the mystery of underwater colour, by looking 'through the fishes eyes'....

Screening worldwide, earning highest Awards, series 'teasers' '*FISHEYE FANTASEA*', '*BEYOND THE*

*BLUE* and *COLOUR TALKS* are taking Film Festivals by storm. 'MERIT OF EXCELLENCE', 'SILVER MEDAL', '1st PRIZE' & several times 'BEST FILM' winner *Fisheye Fantasea* is followed by *Beyond The Blue*, a fluorescence special which immediately scooped 'SPECIAL JURY AWARD' in Belgrade, followed by 'FIRST PRIZE', 'BEST FILM' in Moscow and 'BEST FILM' in Italy this week. The films are Nominated for Awards in Japan, France, USA and the UK.

Featuring mesmerizing cinematography, sensational behaviour and phenomena new to science, forcing us to forever rethink our relationship with the oceans creatures, *WATER COLOURS* brings the groundbreaking revelation that 'colour is the cryptic language of fish'... and the most intimate understanding of marine animals yet.
